

## A new generation of disinfectants and cleaning preparations in food industry

- 20 years of **experience**
- **research and implementations** conducted amounting to over 15 million zloty from the *Innovative Economy* programme
- new **pilot plant** for biotechnological solutions in washing membrane equipment
- constant cooperation with the **department of Biotechnology at Wrocław University** within the framework of a scientific consortium dealing with new pro-ecological solutions for the industry
- **dynamic team** creating innovative solutions in order to optimise the process of cleaning and disinfecting
- **low price of the disinfectants** including only high quality ingredients and production technology, co-funded by the EU, without surcharge for neither customs, transport, marketing, advertising nor for maintenance of great global concerns which aim only at gaining profits
